DIAMANT-FILM RESTORATION – Spring Update

We are happy to announce the availability of DIAMANT-Film Suite **V9.5** from our well-known solution for automatic, semi-automatic and interactive film & video restoration, cleaning and repair.

What's new in DIAMANT-Film Restoration V9.5

- New video output for AJA cards
- [Object & ROI tracking](#) for all filters
- New workflow integration possibilities (e.g.: MWA NOVA, ARRI, BlackMagic RESOLVE)
- External render location for workflow improvements
- New Contrast & AutoContrast enhancement filter
- [Interactive graphic timeline interface](#) for stabilization
- Added [subpixel precision](#) for StabPinhole
- Reworked safe areas / blanking display
- GUI improvements
- DIAMANT-Film Restoration has opened up for 3rd party restoration filters utilizing a new powerful [OpenFX integration](#) as well as integration of selected and well known film treatment products. Among them are:
 - [DarkEnergy](#)¹: Fast and reliable high quality noise reduction for video and film. This option can be ordered as add-on from HS-ART with significant **discount until 15th of May 2017**.
 - [BaseLight](#)²: Workflow integration of the world's leading high end system for color grading, color management and finishing.
 - [NeatVideo](#)³: OpenFX integration of the well-known and cost effective plug-in, extremely effective on reduction of digital noise.
- And many more ...

Meet with us at:

- SEAPAVAA from 3-8 April 2017 in Manila
- The Reel Thing Amsterdam from 28-30 May 2017
- IBC in Amsterdam from 15-19 September 2017
